

Corey Stanley, PE, CFPS, SET

Corey is currently a fire protection engineer at South Metro Fire Rescue. He has over 22 years of experience in the fire protection industry spanning multiple aspects of the discipline. Corey has worked in various industries such as oil and gas, energy production (hydroelectric, co-gen, nuclear, coal, natural gas), hospital, schools, and commercial. He has worked on conceptual projects through project feasibility studies into full detail design, construction administration, and acceptance testing. He has experience working with private companies and government entities such as the Department of Energy and Department of Defense. His projects have spanned from the North Slope of Alaska to the Middle East, across the continental U.S. and have ranged in difficulty from a small fire alarm upgrade to highly complex fire protection schemes utilizing multiple systems, separation, and engineering controls.

Corey has been a member of SFPE since 2007 and has participated with the Rocky Mountain chapter, the Cascades chapter, and Snake River Valley chapters at different times over that period.

Corey is a Colorado native and would like to help continue the success of the previous SFPE Rocky Mountain Chapter boards.
